Is Installation Weather Dependent?

All Weather Material

GEOWEB® projects are installed in extreme temperatures and weather--from the coldest to the hottest regions of the world.

Rain or snow—keep your crews working through any weather condition.

PRESTO

Watch Short Install Video

See how the GEOWEB® system is installed in this quick step-by-step overview of the construction steps.

Let Our Knowledge Work for You

Our 40+ Years Experience Will Help You on Your Project

The GEOWEB® system is the original—and most advanced geocell on the market.

We developed the technology and advanced the technology.

We have the knowledge & experience to help you solve your site problems.

Can it handle your Site Problems?

Let Us Evaluate Your Project

Your site has problems.

Soft ground. Poor subgrade. Poor drainage.
Heavy loading. Limited road building resources.

Will our solution work?

We can arrange a meeting to discuss your site and evaluate the feasibility of our solutions for your site challenges.

Email info@prestogeo.com to request a site evaluation.

Poor subgrade.
Soft ground.
Poor drainage.

Heavy loading.
Limited road
building resources.

for your project

Can we help Train your Crews?

Learn Efficient Techniques Before You Install Pre-Construction Training. Construction Oversight.

We can arrange to train your crew before installation—with pre-construction meetings and demos—and be there for on-site support during construction.

Email info@prestogeo.com to request construction site support.

Transforming Markets & Industries

See GEOWEB® projects
in action in a variety of
applications & industries.

PRESTO

Heavy Loading

Site Access Roads

- Build fast-to-construct access roads to sites, even in remote areas.
- Use salvaged or low-quality aggregate fill and up to 50% less base.
- One layer solution, even over soft subgrades.

LEARN MORE 

50% Less
Base Materials

Unpaved Roads

PRESTO

Heavy Loading

Roadbase

- Build pavements to reduce deflection and settlement that cause rutting, potholes and pavement degradation.
- Build a stronger base that extends pavement life, even over soft subbase soils.
- Use 50% less cross-section through the strength characteristics of confined aggregate.

LEARN MORE

**50% Less
Cross Section**

Base Stabilization

PRESTO

Medium-Heavy Loading

Road Shoulders

- Build stable road shoulders to eliminate problematic low and soft shoulders, erosion areas and rutting.
- Protect sealed pavement from deterioration and edge breaks.
- Use aggregate or topsoil for vegetated shoulders.

LEARN MORE 

3X Less
Maintenance

Surface Stabilization

PRESTO

Heavy Loading

Oil & Gas Roads & Pads

- Build access road to energy sources that are fast to deploy, even to remote locations.
- Use salvaged or low-quality aggregate fill.
- All-weather HDPE material allows construction year round.

[LEARN MORE](#)

**365 days
Construct in
any weather**

Unpaved Roads

PRESTO

Heavy Loading

Wind Energy Roads & Pads

- Support heavy trucks and equipment across undeveloped, soft ground for wind farm construction and maintenance.
- Build stable staging areas and crane pads for wind tower and turbine installation.
- Use up to 50% less fill—even low-quality aggregate or sand.

LEARN MORE

Sand Fill Use Low Cost, Low Quality Fill

Unpaved Roads

PRESTO

Heavy Loading

Airports

- Reinforce the pavement base and reinforce shoulders for runways and taxiways.
- Reduce deterioration of overlying asphalt and concrete pavements.
- Create a stabilized drainage layer to capture de-icing liquid runoff.

[LEARN MORE](#) 

Base & Surface Stabilization

PRESTO

Heavy Loading

'Power' Concrete Roads & Pavements

- Build stronger concrete roads and pavements that exhibit the flexibility of articulating permeable pavers and the strength of hard-armored concrete slabs.
- No formwork and reinforcement required.

[LEARN MORE](#) 

15-25%
Reduced
Pavement Cost

Concrete Pavements

PRESTO

Heavy Loading

Mine Haul Roads

- Build haul roads to support heavy loaded mining trucks with faster cycle times, lower rolling resistance, higher fuel savings, and less tire wear & maintenance.
- Fast deployment even to remote locations.
- Use waste rock or low-quality aggregate fill.

[LEARN MORE](#) 

A large-scale mining operation with a haul road. A yellow mining truck is driving on a road that appears to be constructed from waste rock. The background shows a large open-pit mine with terraced levels of earth and a line of trees under a cloudy sky.

**Faster
Cycle Times
Use Waste Rock**

Unpaved Haul Roads

PRESTO

Heavy Loading

Port & Intermodal Yards

- Build stable pavements to support heavy container traffic.
- Solve surface stability problems inherent with unpaved yards (deep ruts, potholes) with durable, aggregate & permeable pavements.
- Place under asphalt & concrete pavements to resist base settlement with 50% less base materials.

[LEARN MORE](#) 

A photograph of a construction site at a port or intermodal yard. Two workers in safety vests and hard hats are standing on a gravel surface. In the background, there are several large blue and orange shipping containers. The foreground shows a black, grid-like permeable pavement structure being installed over a gravel base. A white play button icon is overlaid on the image.

**Permeable
OnSite Stormwater
Storage**

Base & Surface Stabilization

PRESTO

Heavy Loading

Rail Ballast

- Stabilize and stiffen the track ballast layer more efficiently than 2D geogrids, especially in soft soil areas.
- Eliminate differential settlement problems at x-ings, wyes, and frogs.

[LEARN MORE](#)

Accredited Performance

- Extreme field testing and research at TCI and Oregon State University and SmartRock testing at U Kansas.

See the Accredited Research >>

Ballast Reinforcement

PRESTO

Medium-Heavy Loading

Permeable Pavements

- Build highly-porous pavements to manage stormwater onsite and reduce runoff.
- Use open-graded aggregate for maximum infiltration & stormwater storage.

LEARN MORE

Meet Stormwater Regs

Water Flow

Surface Stabilization

PRESTO

Light-Medium Loading

Multi-Use Trails

- Build permeable, stable trail surfaces with 3D confined fill for pedestrian, equestrian, ATVs, bicycles and vehicle loading.
- Build across soft soils and environmentally-sensitive areas with minimal disturbance.

LEARN MORE 

Surface Stabilization

PRESTO

Light-Medium Loading

Tree Root Protection

- Protect a tree's Critical Root Zone from compaction and root damage from construction equipment and access vehicles.
- Protect trees in soft soil areas or where no-dig restrictions apply.

[LEARN MORE](#) 

Surface Stabilization
